

EDUCATION BACKGROUND

Beijing Forestry University (BJFU)

2021-2026

Bachelor of Engineering in Urban and Rural Planning (expected in 06/2026)

- GPA: 90.68/100
- Second-class Excellent Student Award & Scholarship of BJFU (Twice)
- Third-class Excellent Student Award & Scholarship of BJFU (Twice)
- Excellent Student Secretary Award

INTERNSHIP

China International Engineering Consulting Corporation

11/2025-Present

Assistant Urban Planner

- Conducted on-site field research to complete local government interviews and collect baseline data in support of regional planning work.
- Contributed to revisions of key sections within local economic and social development plans.
- Assisted with compliance reviews of PPP concession schemes for multiple government and public-private partnership projects, with responsibility for formal assessment reports and review comments.

RESEARCH

Temporal Evolution of Public Transit Network Equity: A Case Study of Shenzhen, China

08-10/2025

Individual Research Program

- Used GIS to measure changes in public transportation resource allocation across streets and towns in Shenzhen.
- Conducted a comprehensive evaluation of the social equity performance of public transportation.
- Summarized research findings and wrote a paper (under submission).

COMPETITIONS

“Future Planners” National University Student Territorial Spatial Planning Competition

03-05/2025

Project: Flower Cores – Urban Village Redevelopment Design based on Urban Middle Platform (Team Leader)

- Applied urban platform concepts to site planning and building renovation using Rhino, AutoCAD, and AI.
- Developed the architectural scheme and visual renderings with Photoshop to support the development of the urban village’s floral industry.
- Proposed the design scheme of an urban platform integrating production, living, and transport functions across an urban village and an industrial park.
- Awarded the **Second Prize** in the final evaluation.

2025 WUPENiCity International Competition on Urban Sustainability Reports

03-05/2025

Project: Trapped in Time and Space: Merchants’ Perception and Drivers of Spatiotemporal Compression in Food Delivery

- Conducted spatial analysis of digital commerce in Beijing, using ArcGIS and surveys to examine urban spatiotemporal compression.
- Explored interactions among merchants, platforms, and couriers to reveal patterns of spatial use, digital control, and user perception.

2024 WUPENiCity International Competition on Urban Sustainability Reports

02-05/2024

Project: A Ritualistic Study of Beijing’s New Performing Arts Spaces from the Perspective of Spatial Production Theory

- Collected and analyzed spatial data on new performance venues in Beijing using ArcGIS and SPSS to study their relationship with surrounding commercial vitality.
- Applied hierarchical and ridge regression analyses to identify physical and perceptual factors shaping the sense of spatial ritual based on Lefebvre’s theory of the production of space.

ACTIVITIES

Director, The Youth Students’ Union, School of Landscape Architecture, BJFU

2021-2023

- Organized and participated in school-level curricular and cultural activities.
- Collaborated on inter-school affairs with other universities in Beijing.

Volunteer, Beijing-Hong Kong-Macao Student Exchange Summer Camp

2023

- Assisted in organizing cultural exchange activities between students from Beijing, Hong Kong, and Macao.
- Supported event coordination and communication and provided guidance for participants.

ADDITONAL INFORMATION

- Software Skills: Photoshop, AutoCAD, InDesign, Rhino, Grasshopper, Adobe Illustrator, D5, ArcGIS, SPSS, Depthmap
- Online Portfolio: <https://www.dropbox.com/scl/fi/pgy9hbd6oox0sia9am796/EPFL.pdf?rlkey=502tzfsruzy1w9m9etwrted3i&dl=0>
